

Favorites

SECTION A.1 - STR I

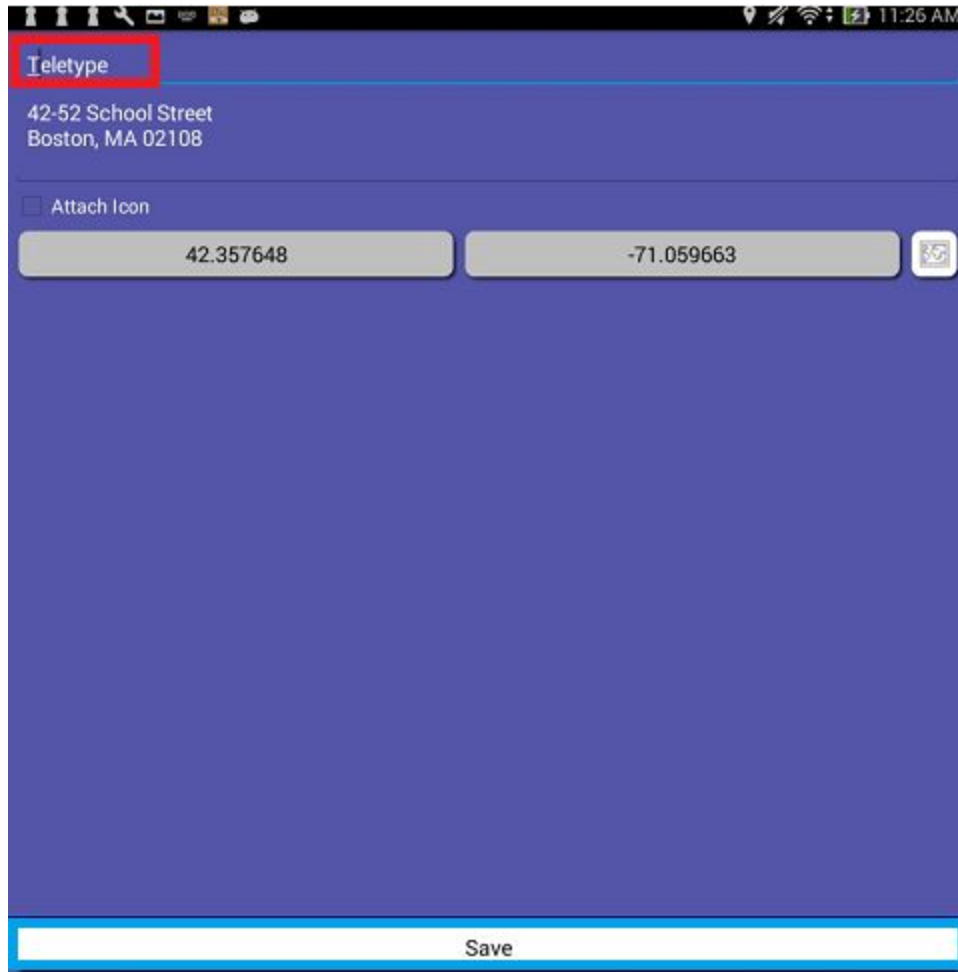

Destinations can be saved using the Favorites menu. If you need to import favorites from SmartTruckRoute (version 1) into SmartTruckRoute Ver 2, please see Section B.2 below.

You can easily save a destination by name by using the favorites menu. Search for a location and select the point you would like to add to your favorites by tapping and holding the spot on the map.

Select “Add to Favorites” (above) to take you to the save options (below). In the save options, you may decide to rename your location and add a unique icon to show it on the map. When satisfied with your edit, tap “save.”

Another way to add to your Favorites is by tapping and holding your recent locations (below). A menu will popup and you can select "Add to Favorites."

You can edit a favorite by holding your finger on the favorite entry, then select Edit.

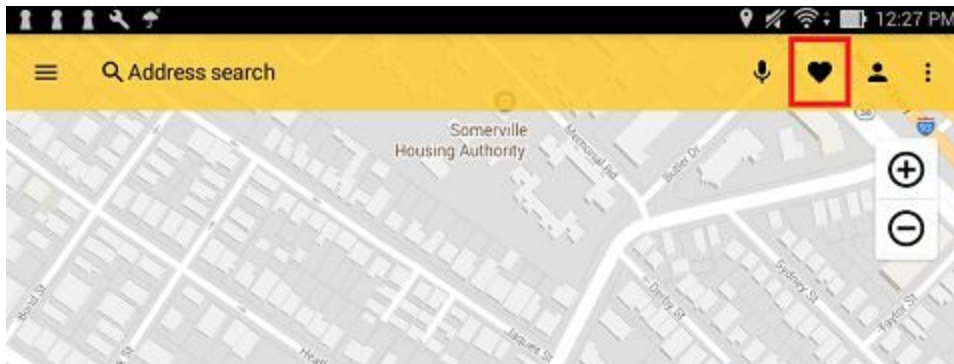

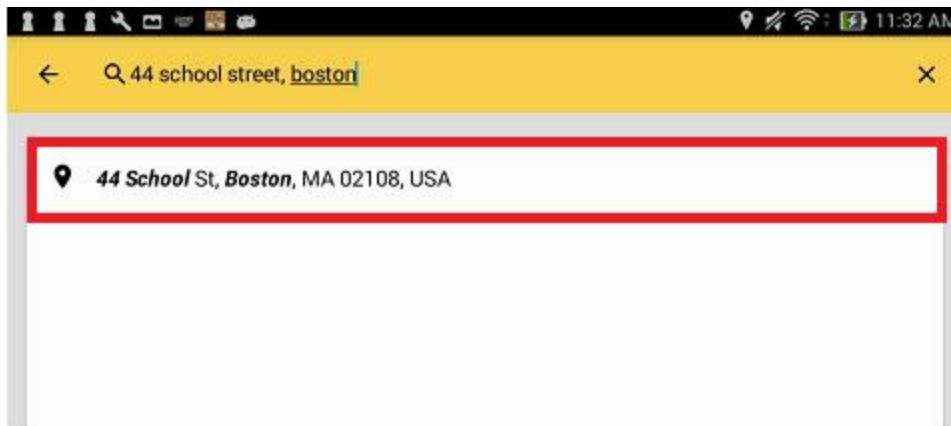

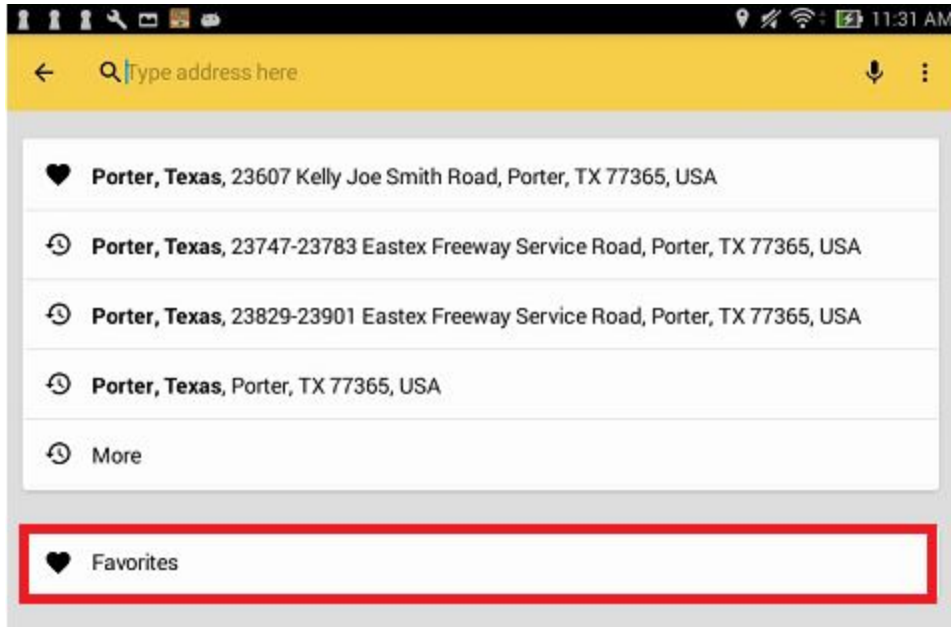

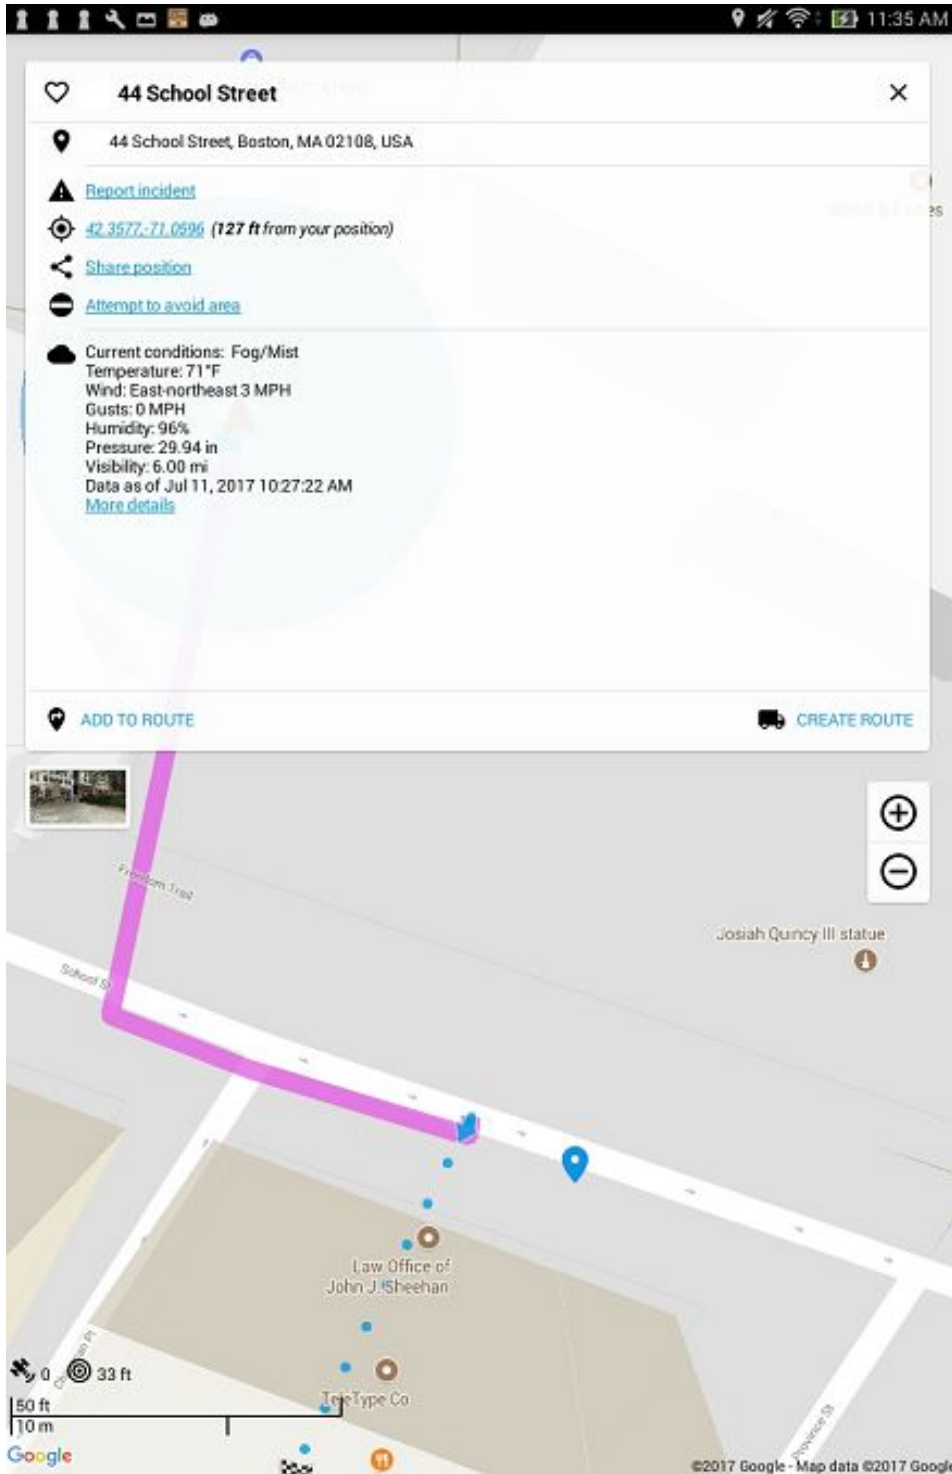

SECTION A.2 - SMARTTRUCKROUTE II

For users with STR II, to add a Favorite, search for a location and select the point you would like to add to your favorites by tapping and holding the spot on the map. Note that during your search you are also able to access your Favorites directly.

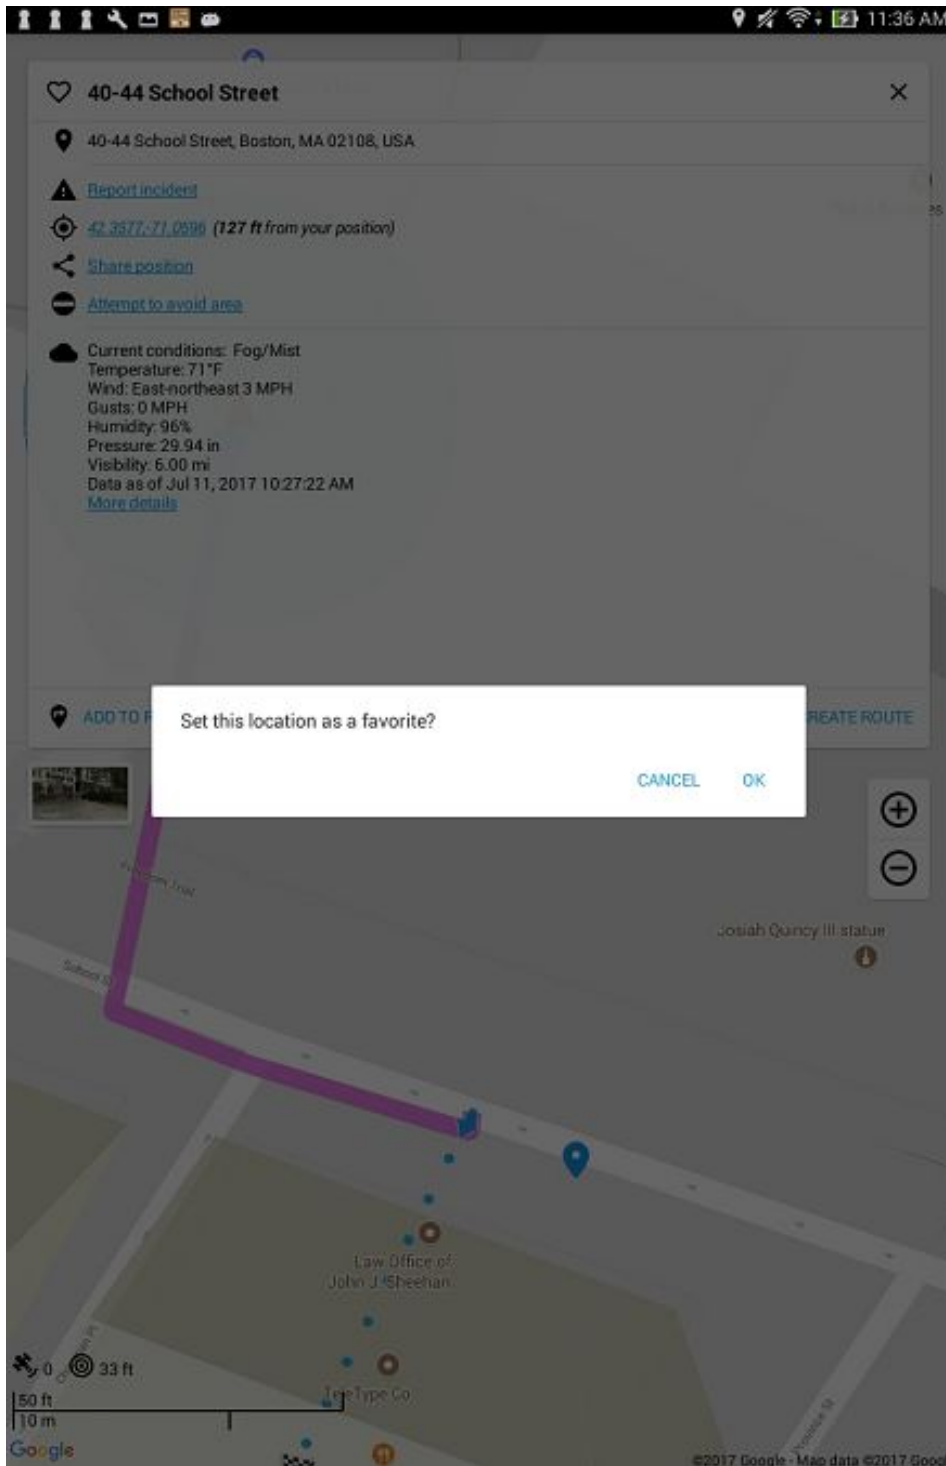

After holding your point, the address of that location will be shown along with other details including “Report incident, the point’s coordinates, share position and the current weather at that point” (shown below).

Select the ♥ to the left of the point's address to Add to Favorites (above) and you will be prompted to "Set this location as a favorite" (below). Select "OK."

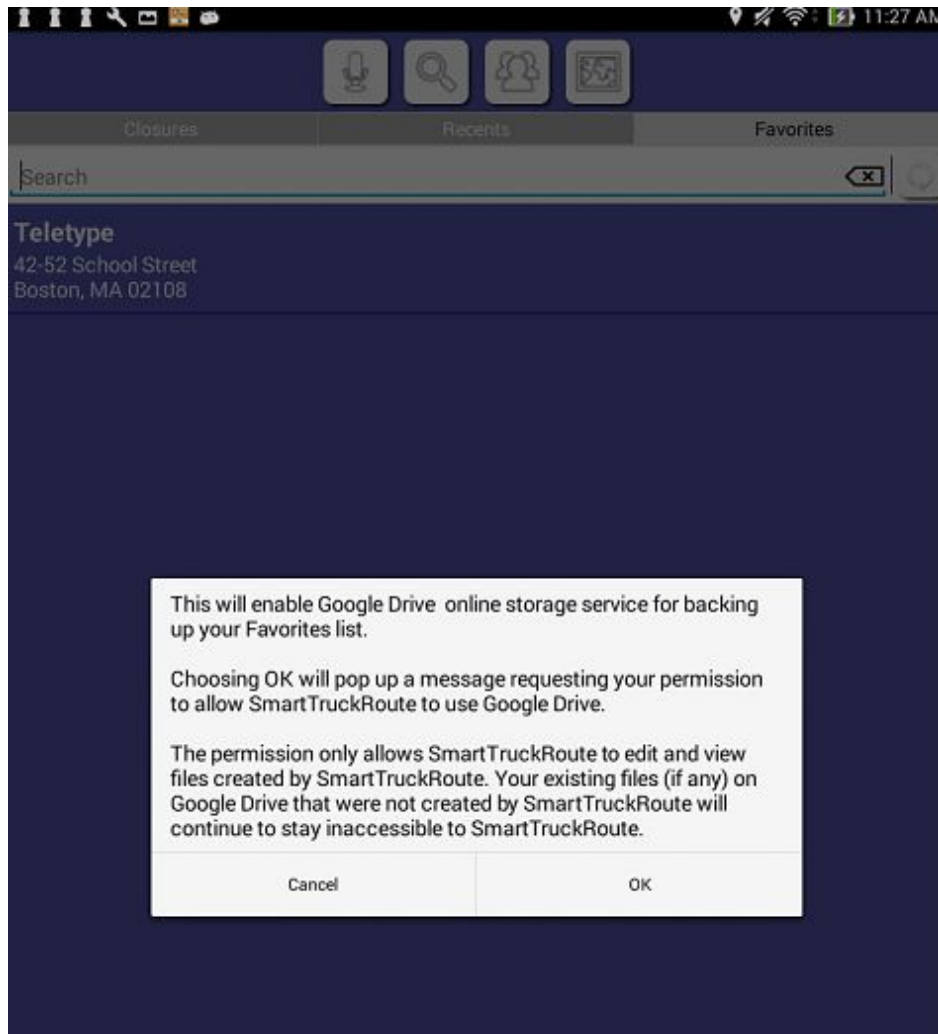

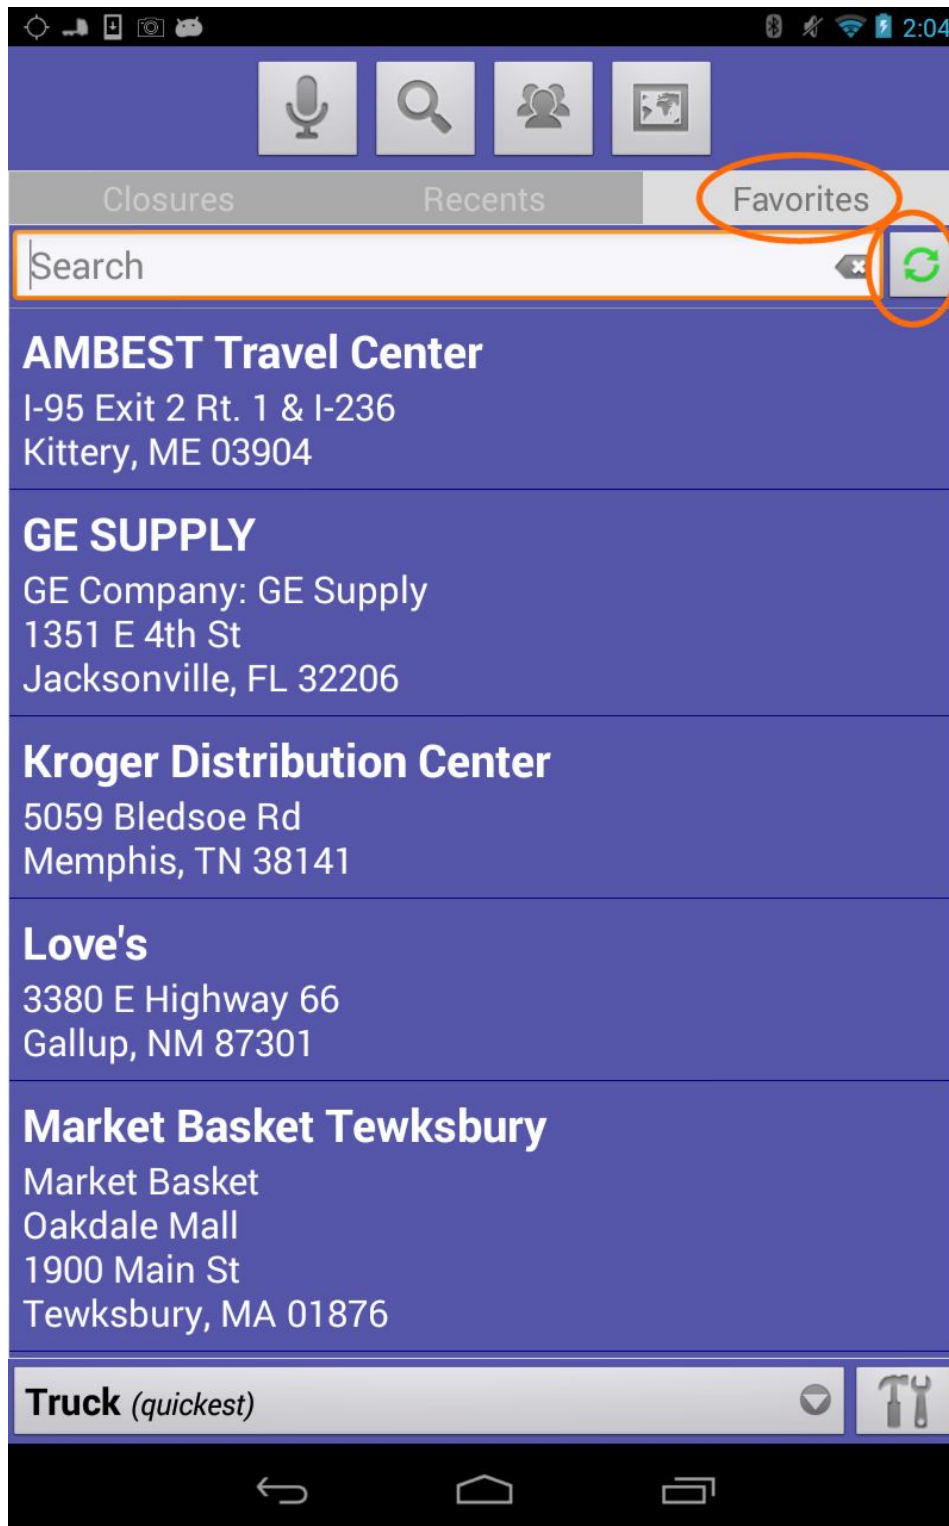

Backup/Restore and Transferring Favorites between Phones

Remember to sync your favorites in case you need to replace your phone. Use the green circular two arrow icon to sync your addresses and favorites.

SECTION B.1 - STR I

To begin storing your favorites to the online database, tap the grey circular arrows to the right of your "Favorites Search bar." The notification below will popup. Tap OK if you agree with the terms.

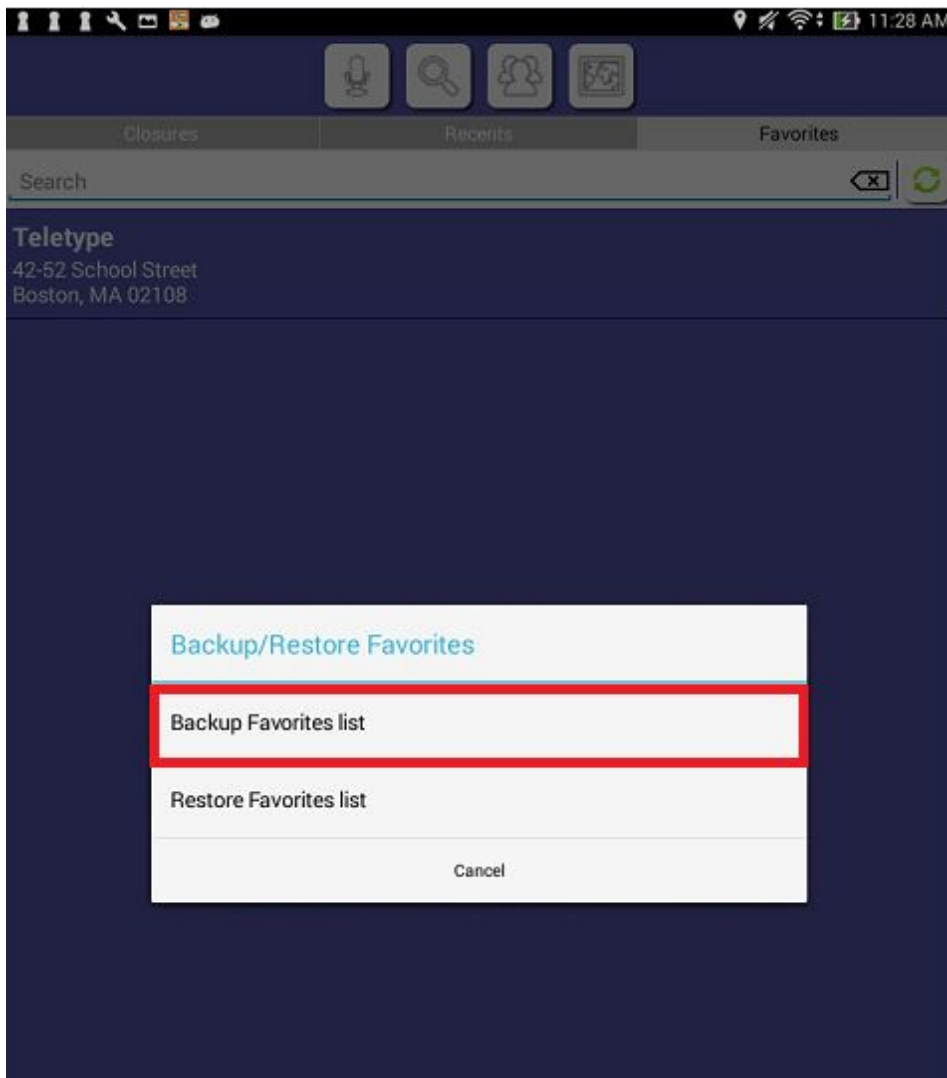

Your favorites can be backed up and restored using the same circular two arrow icon located next to the search bar. The screenshot above has a circle around the Favorites tab and the circular sync

icon. Favorites are stored on your the Google Drive associated with your phone in the folder called SmartTruckRoute.

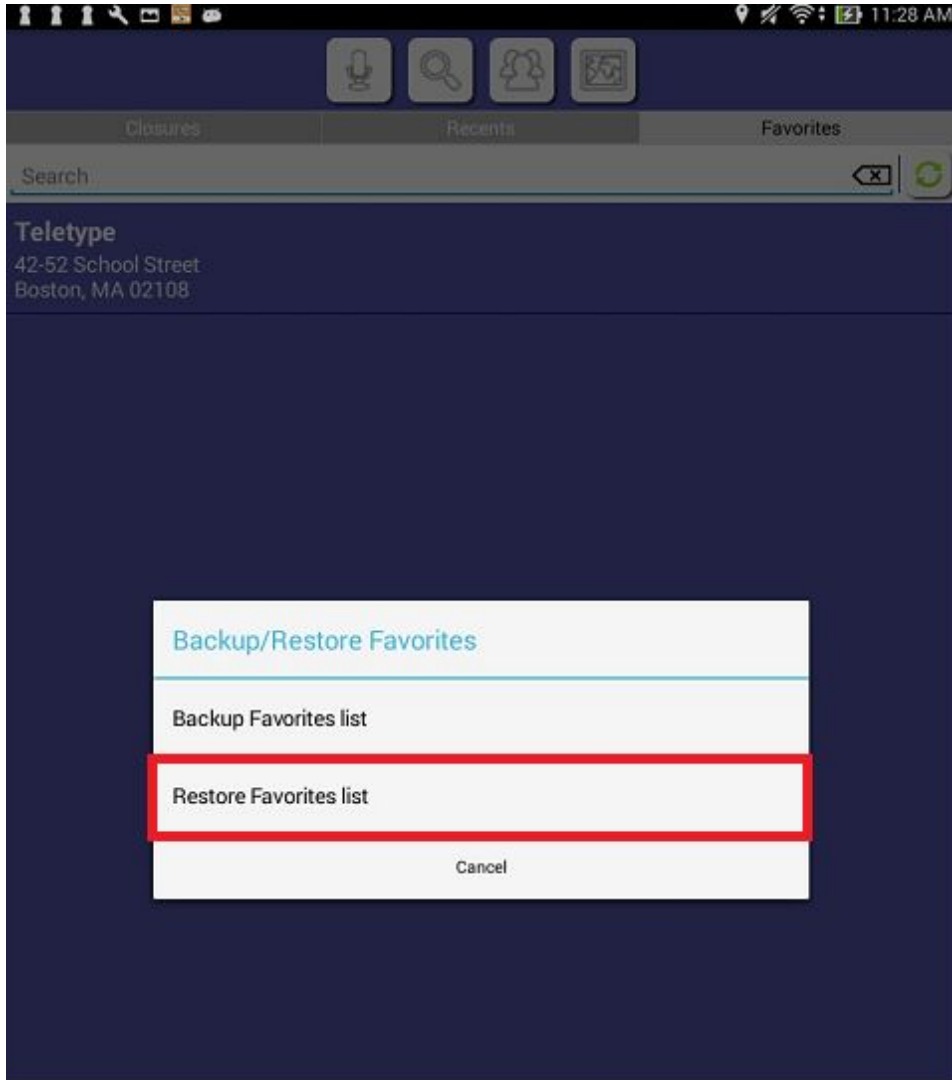

To save your favorites when you are ready to transfer your phone information:

1. Go to the Favorites tab.
2. Tap the green sync arrow icon (on the top right next to search)
3. Select Backup

To restore your favorites on the same phone or on your new phone

1. Go to Tab favorites
2. Tap the green sync arrow icon
3. Select Restore

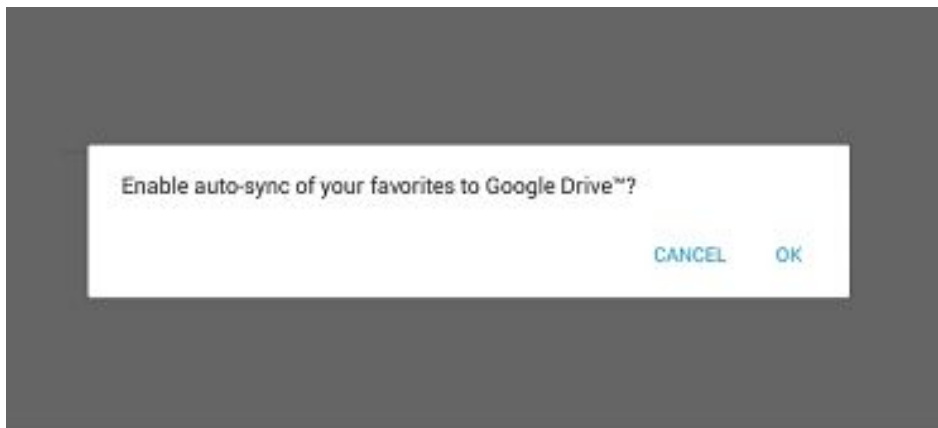

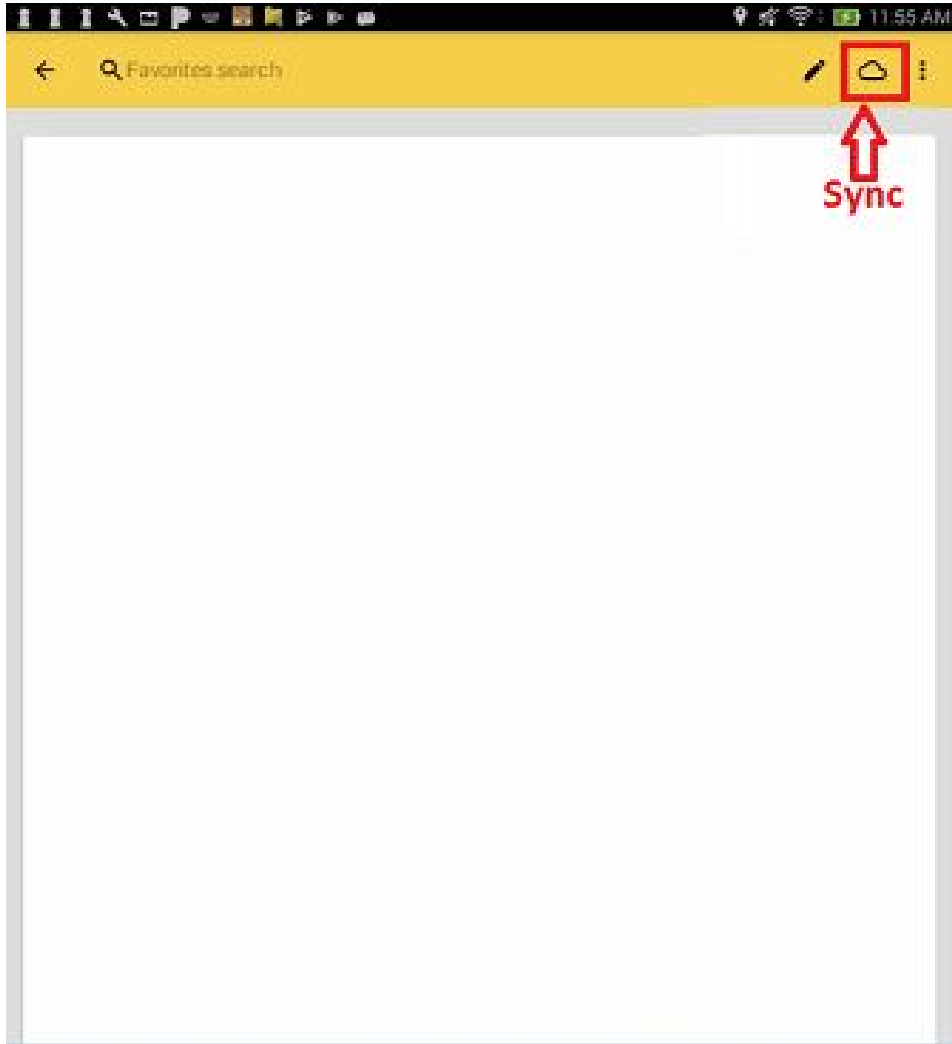

Another option to store favorites is to use the contact list on your phone or tablet to store the address.

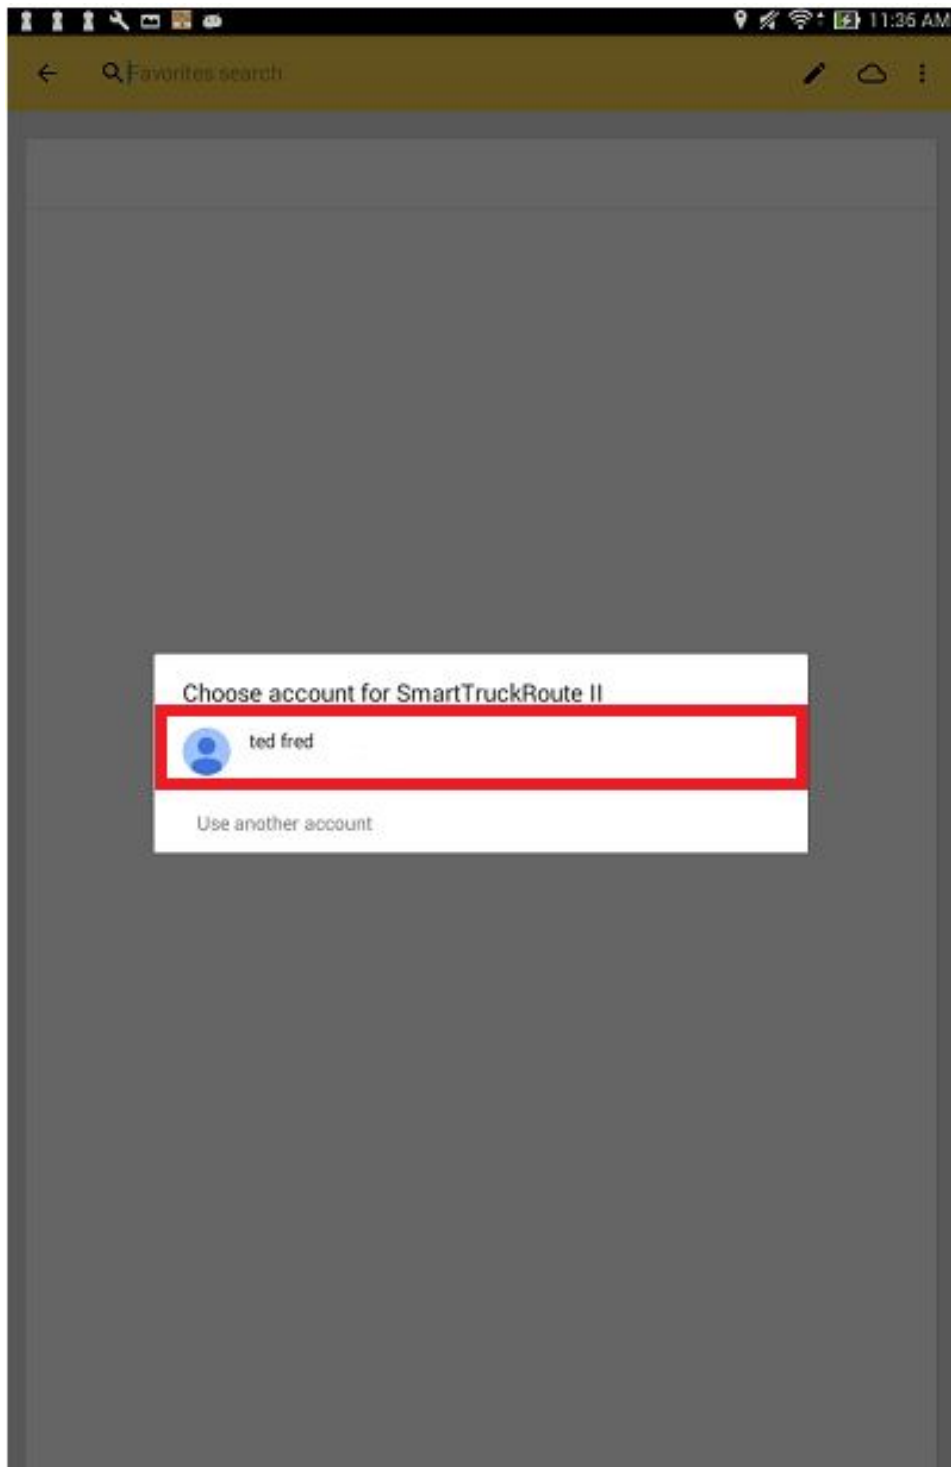

Example: Create a contact called TeleType, enter the address (44 School Street, Boston, MA 02108). To navigate to this contact, tap on the third (people) icon, when prompted select SmartTruckRoute as choice of app for navigation.

SECTION B.2 - STR II

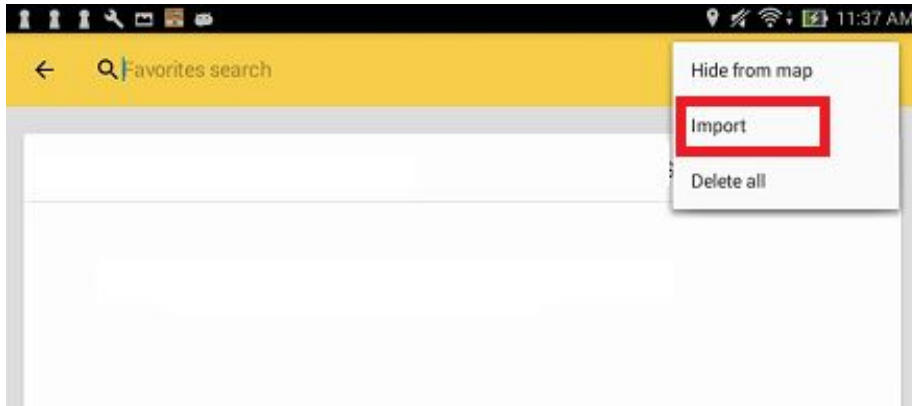

To begin storing your favorites to the online database, tap the cloud icon  to the right of your “Favorites Search bar.” The notification below will popup. Tap OK if you agree with the terms.

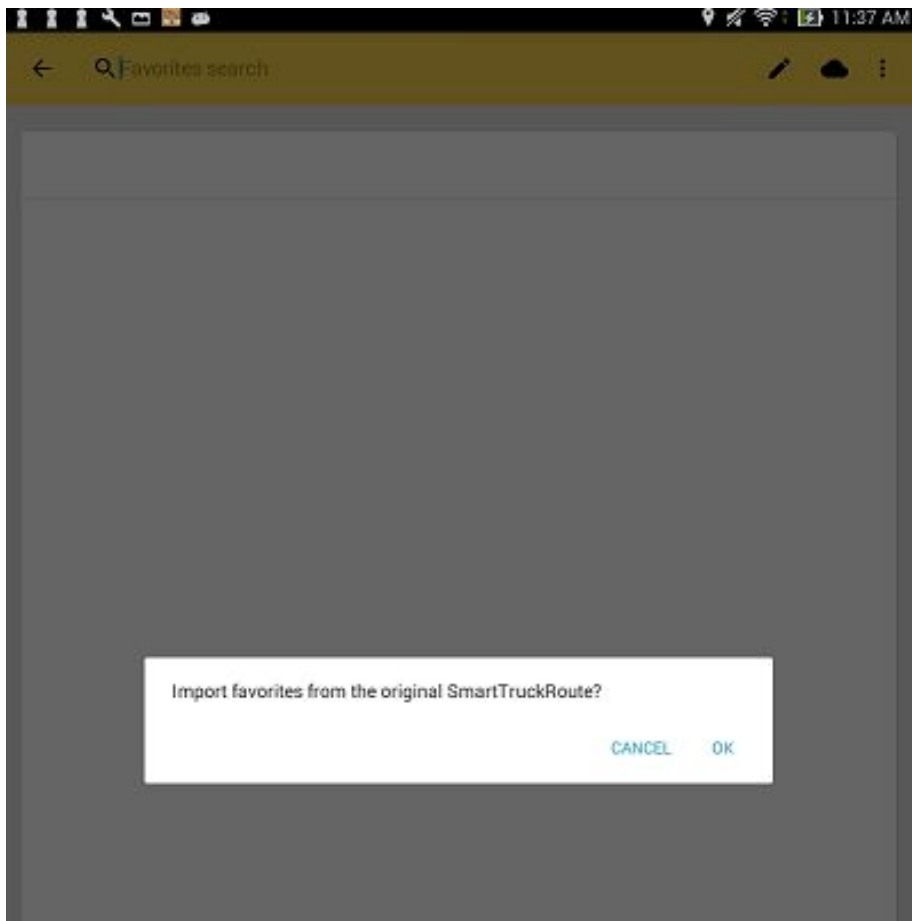

You will be prompted to select a google drive account to associate with the data saved (below).

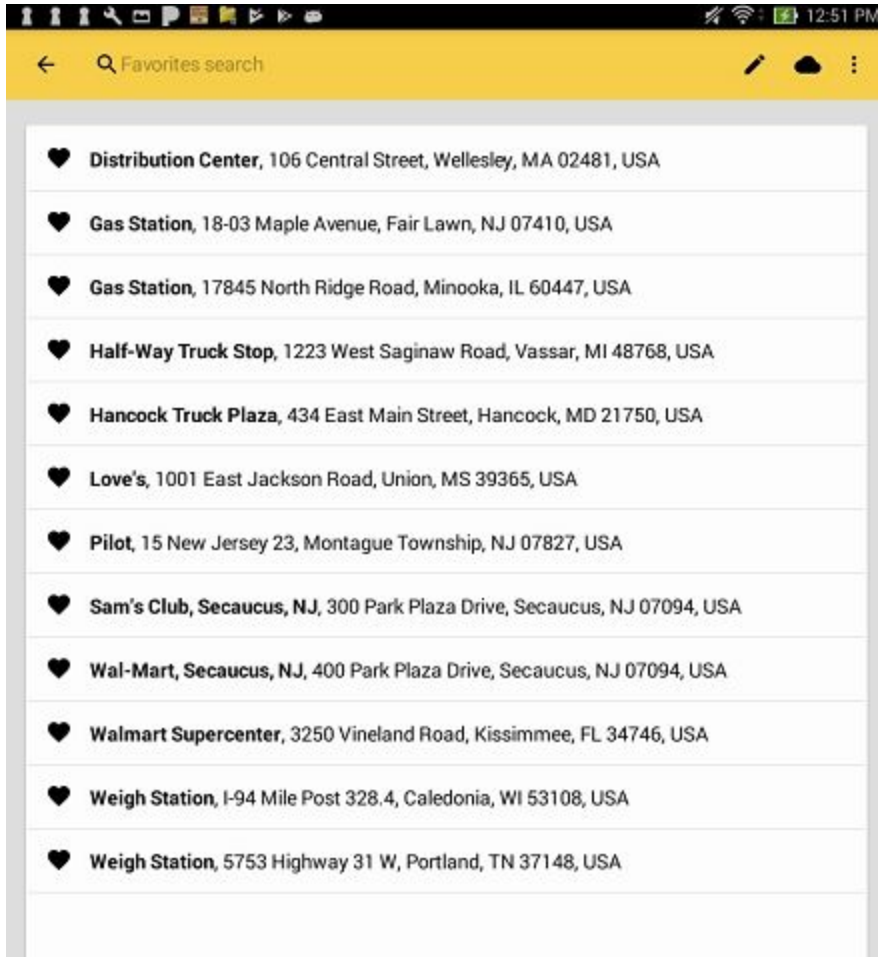

After selecting an account to use for auto-sync, all your new favorites will be automatically saved (backed-up) to the online database. To import (restore) your older favorites from your online database, tap the  icon to the right of your "Favorites Search Bar" and select "Import" (below).

You will be prompted to import favorites. Select "Ok" if this is your intention.

All favorites will now be shown in your Favorites section.
