

Android developers and dispatchers can push destination coordinates to the SmartTruckRoute app by following these examples:

1) Address Search: Brings up Address Search View and uses the text after "q=" as the search query.

<https://www.smarttruckroute.com/via/truck?q=44+School+Boston+MA>

2) Route using GPS coordinates: Directly routes to the lat/lon after "@" and uses the text after "daddr=" as the destination label.

<https://www.smarttruckroute.com/via/truck?daddr=Boston,+MA@42.3581,-71.0636>

3) Route using address: Directly routes to the first result in the Google address search results for the string.

<https://www.smarttruckroute.com/via/truck?daddr=44+School+Street+Boston+MA+02108>

Note that is more accurate to search with zip code in case of multiple results with the same street names within the same city.

4) Sending multiple destinations: In the same email include multiple links.  
email

<https://www.smarttruckroute.com/via/truck?daddr=Boston+MA@42.3581,-71.0636> or text compressed version <http://goo.gl/7jh07V>

email

<https://www.smarttruckroute.com/via/truck?daddr=New+York+NY@40.7127,-74.0059> or text compressed version <http://goo.gl/uA0Yar>

5) Send multiple destinations within the same link via email or text  
email

[https://smarttruckroute.com/via/truck?daddr=LastStop\\_CompanyStore@42.142378,-71.2087947&vaddr=Stop2\\_Factory@42.092643,-71.055228&vaddr=Stop3+PickParts@41.905831,-71.0526167&vaddr=Stop4\\_HomeDepot2@42.0083858,-71.1921208](https://smarttruckroute.com/via/truck?daddr=LastStop_CompanyStore@42.142378,-71.2087947&vaddr=Stop2_Factory@42.092643,-71.055228&vaddr=Stop3+PickParts@41.905831,-71.0526167&vaddr=Stop4_HomeDepot2@42.0083858,-71.1921208)  
or text compressed version <http://goo.gl/BgfR5F>

You can also send an optimized or non optimized route with stops directly

from [SmartTruckDispatch](#)

Each link sent can be hyperlinked to have a better appearance

6) Send multiple destinations within the same link via email and avoid (xaddr) email

[https://smartruckroute.com/via/truck?daddr=LastStop\\_CompanyStore@42.142378,-71.2087947&vaddr=Stop2\\_Factory@42.092643,-71.055228&xaddr=Stop3+PickParts@41.905831,-71.0526167&vaddr=Stop4\\_HomeDepot2@42.0083858,-71.1921208](https://smartruckroute.com/via/truck?daddr=LastStop_CompanyStore@42.142378,-71.2087947&vaddr=Stop2_Factory@42.092643,-71.055228&xaddr=Stop3+PickParts@41.905831,-71.0526167&vaddr=Stop4_HomeDepot2@42.0083858,-71.1921208)  
or text compressed version <http://tinyw.in/XIPc>

7) More detailed documentation on the possible route request please download the [documentation](#)

8) Example of sending a route directly from one Android Application or a Web page to SmartTruckRoute. Code is

"<http://smartruckroute.com/route/car?daddr=Home@42.340741,-71.087143>" [send code from here](#)

9) Example of sending a route directly from one Android Application or a Web page to SmartTruckRoute with truck parameters and configuration. Code is

"<http://smartruckroute.com/route/truck?daddr=Warehouse@42.283695,-71.607620&vehConfig=us,162,636,102,80000,0,5,1,1>" [send code from here](#)

9) Example of sending a route directly from one Android Application or a Web page to SmartTruckRoute with intermediate stops Code is

"[http://smartruckroute.com/route/truck?vaddr=WP1,8900NW35thLn\\_Doral\\_FL33172@25.8072391,-80.3392561&vaddr=WP2,2425PrincessAnneRd\\_VirginiaBeach\\_VA23456@36.7522145,-76.0547951&daddr=WP3,5681KingsportDr\\_Atlanta\\_GA30342@33.9096952,-84.383362](http://smartruckroute.com/route/truck?vaddr=WP1,8900NW35thLn_Doral_FL33172@25.8072391,-80.3392561&vaddr=WP2,2425PrincessAnneRd_VirginiaBeach_VA23456@36.7522145,-76.0547951&daddr=WP3,5681KingsportDr_Atlanta_GA30342@33.9096952,-84.383362)" [send code from here](#)
